SUMMARY: Software Engineering professional with 8+ years of experience leading, building and testing large enterprise AI driven applications.

- Led end-to-end delivery of complex features, maintaining a consistent track record of accurate scoping and on-time releases.
- Engineered an autonomous, AI-driven development pipeline utilizing Model Context Protocols (MCPs) to seamlessly extract Jira/Confluence requirements, scaffold code, generate Selenium tests, and conduct SCM DevOps reviews.
- Strong expertise with building web and native systems using **GraphQL, RESTful Web APIs and Reactive Approach**.
- Proficient with **Data Structures and Object-Oriented Programming** in JavaScript, Java and Python.

WORK EXPERIENCE

Oracle America INC – Redwood City, CA
Member of technical staff (Full Stack).

Aug 2021 – Present
(4.7 years)

Product:

- Architected and scaled core features for two OCI PaaS products: Oracle Integration Cloud (OIC) and Process Automation (OPA).
- Partnered cross-functionally with Design and Product teams to define technical roadmaps, project estimates, and release criteria.
- Engineered HITL use-case, allowing AI agents to pause execution and trigger approval workflows for safe edge-case resolution.
- Collaborated with Data Science to fine-tune AI models, optimizing generational accuracy across core product features.
- Built an event-driven abstraction layer to decouple a highly complex, monolithic drag-and-drop UI component (Structured Process Builder), transforming it into a reusable micro-frontend adopted by 2 other products.
- Built custom React hooks to abstract complex business logic and optimize front-end rendering performance.
- Developed GraphQL queries and REST with OpenAPI spec for core business logic to power complex front-end workflows.
- Owned the development of the OPA Decision Adapter, enabling seamless platform integration across the Oracle cloud (OCI)
- Technologies used: JavaScript/TypeScript, Python, Java, Kotlin, Spring Boot, React.js, Kafka, Kubernetes, GraphQL.

Infrastructure:

- Led the migration of testing infrastructure to Playwright, driving developer adoption and eliminating frequent release regressions.
- Headed an error management initiative for support to independently resolve on-call issues, reducing engineering escalations.
- Engineered distributed state management infra for host shell and 14 micro-frontend plugins utilizing Redux reducer injection
- Collaborated on the global release process, utilizing Shepard for stable and consistent product rollouts across **18 OCI regions**
- Mentored API teams in front-end development concepts and best practices and documented processes for future reference.

Veritas Technologies LLC – Roseville, MN

Dec 2017 – Aug 2021

Front End Engineer

(3.5 years)

- Implemented a modern UI for NetBackup, A backup and restore infrastructure for different workloads and Databases.
- Led Jobs Hierarchy module (most visited page by users) by rebuilding from scratch and adding several new functionalities.
- Developed reusable web components for a suite that creates, schedules, monitors plans for the different storage solutions.
- Volunteered in development of UI reusable components for open-source library for Angular developed at Veritas.
- Technologies used: Angular, TypeScript, Java, RxJS, Lodash, Sass, Cypress, Linux, Shell and VDL.

Shutterfly, Inc. – Redwood City, CA

Jun 2017 – Aug 2017

Front End Engineering Intern

(3 months)

- Worked with the core team to optimize existing and implement new features on the home page of Shutterfly.com.
- Implemented new features on internal dynamic content management (CMS) tool which manages all image assets.

Digitalmain, Inc. – Cupertino, CA

Apr 2017 – May 2017

Front End Engineering Intern

(2 months)

- Headed front-end development to create a detailed web forum with AI components integrated in a Webapp.
- Implemented push notification for new incoming messages using event listeners and service workers.

EDUCATION CREDENTIAL:

- | | | |
|--|----------------------------------|--------------------|
| • San Jose State University. | Master's in Software Engineering | 2015 – 2017 |
| • Rajiv Gandhi Institute of Technology, (Mumbai University). | Bachelor of Engineering (B.E IT) | 2010 – 2014 |

Skills and Technologies:

- HTML5, CSS3, SASS, JavaScript, TypeScript, ES6, GraphQL, Preact, NodeJS, RxJS, ReactJS, Angular, Spring Boot, Spring MVC, JSP, Service Workers, D3JS, jQuery, Webpack, Babel, NPM, Jenkins, Docker, Amazon Web Services (AWS).
